SIEMENS ULTIMATE LOAD CENTER

Features

1. *INSTA-WIRE*[®] neutrals and grounds provide quick and easy neutral conductor installation.
2. Visible neutrals make insertion of neutral conductors easier.
3. Neutral, ground, breaker, trim, bond, upper pan adjusting, and wire binding screws come up with a slot/square combination head.
4. Factory installed, *INSTA-WIRE* visible ground bars on main lug devices.
5. Pre-positioned bond screw makes bonding a snap.
6. All devices are main convertible from main lug to main breaker and vice-versa.
7. All devices are main straight in wired.
8. New horizontal main breaker handle is invertible allowing 180° installation.
9. Comes with a combination flush/surface mount cover.
10. Siemens circuit breakers are series rated for full protection and lower component cost.
11. Side hinged outdoor enclosure.
12. Trim mounting tabs free up both hands to install the trim.

SIEMENS LOADCENTERS

SIEMENS EQ & CONVERTABLE MAIN LUG LOAD CENTERS

12-16 CIRCUITS—1 PHASE, 125 AMPS—ALUMINUM BUS
 NOTE: "CU" DESIGNATES COPPER BUS

Rated for 100,000A IR maximum systems. Trim fits both surface and flush mounting applications. Interiors offer removal in seconds. Single phase. One piece bus bar construction. Designed for use only with Siemens circuit breakers. Exclusive split neutral. Main lugs and neutral on same plate, same drive. Simple upper pan adjustment after trim is installed. UL Listed for 60/75° C conductors.

*Easily converts to main breaker panel using appropriate kit.
 See Page C-2 for Conversion Kits

*Suitable for use as service entrance equipment when not more than six main disconnecting means are provided and when not used as a lighting and appliance branch circuit panelboard.

Suitable for use as service entrance equipment when a main breaker (100A max.) is back-fed in a branch position, and used with main breaker retainer clip.

SIEMENS EQ CIRCUIT BREAKER ENCLOSURE LOAD CENTERS

Rated for 65,000A IR maximum systems. Suitable for use as service entrance equipment. UL Listed for 60/75° C conductors.

SIEMENS LOADCENTERS & BREAKERS

SIEMENS EQ & CONVERTIBLE MAIN BREAKER ULTIMATE LOAD CENTERS

22,000A IR. Load centers with a single main breaker feature a combination trim boxed in one package. The trim fits both surface and flush mounting applications. Interiors offer removal in seconds. One piece bus bar construction. Designed for use only with Siemens circuit breakers. Simple upper pan adjustment after trim is installed. Exclusive split neutral. UL Listed as suitable for use as service entrance equipment. UL Listed for 60/75° C conductors. Standard factory installed 22kA IR main circuit breaker. Positive load side circuit breaker hook rail.

† Easily converts to main lug panel.
 See accessories for appropriate kit.

SIEMENS BREAKERS & ACCESSORIES

SIEMENS SURGE ARRESTER CIRCUIT BREAKERS

Compact design incorporating (2) 15A or 20A 1-pole circuit breakers in series with surge arrester module. Plug-in load center mounting is easy to install. One device will protect the entire electrical system. Can withstand high impulse currents (40,000A per phase). Illuminated LED's indicate surge protection functioning. Perfect for retrofit — replaces (2) 1" breakers without losing any circuits.

SIEMENS MOTOR CONTROL

ESP100...For Advanced, Cost Saving Control.

The First Major Technical Advancement in NEMA Rated Motor Starters in More Than 20 Years. ESP100 Combines the Familiar, Rugged Characteristics of a Proven NEMA Rated Contactor With a No Nonsense Solid State Electronic Overload.

Phase Loss Protection. Trips within three seconds on loss of phase.

No Heater Coils! Eliminates the cost of stocking, inspecting, sizing and installing heaters.

Ambient Insensitive. No more heat related nuisance trips. The overload is unaffected by temperatures ranging from -22° F to +159° F (-3° C to +70° C).

Energy Savings. The energy consumed in using heater elements is eliminated—forever.

Self-Protection Against Short Circuit Damage. Solid-state overload design is fully isolated and protected against any overcurrent damage.

+2% Repeat Trip Accuracy. Electronic precision replaces the mechanical approximation and variability of starters with thermal overload designs.

UL Listed and CSA Certified. Field proven over three years in a broad range of industries.

No Extra Cost. ESP100 is priced comparably to conventional starters with heaters.

NOW AVAILABLE!

ESP100 Solid State Overloads Are Now Available Separately For Universal Starter Applications.

For The Price Of The Overload, You Can Upgrade Your Existing Starters And Enjoy ESP100 Advanced, Cost Saving Control.

CALL FOR DETAILS.
