WIRELESS LIGHTING

LUTRON WIRELESS LIGHTING CONTROL

Create a safe path of light to, through, and around the home.

Contractor Benefits:

- maximize profits – entire system installs in under 30 minutes
- pre-programmed – works right out of the box
- new technology – install only 1 dimmer on a 3-or 4-way circuit without replacing other switches
- easy to order – complete system in one package

Builder Benefits:

- differentiates – standardize, gain the competitive edge
- cost effective – small investment, increases home's value
- simple installation – pre-programmed, installs like a switch
- patented RF technology – over a decade of proven reliability

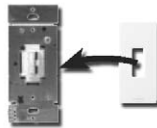

Homeowner Benefits:

- enhances safety – light a path from the car into the home
- saves energy – dimming 50% saves 40% on electricity
- easy to use – press a button, control 5 areas of light

Wireless Controller (1)

Place on the car visor, mount on a wall, or carry it with you. (3) buttons control your lights: "All On" turns system lights on to full bright – "All Off" turns system lights off – "Favorite" turns all 5 dimmers on to their locally set light levels.

Dimmers (5)

Install like a switch. Adjust light levels with the slider – turn on and off by pressing the button. 600W incandescent loads. Designer Inserts (5) Snap onto dimmer — for use with designer-style wallplates.

Master Control (1)

Plug into a standard wall outlet and place on a table or counter-top. Press a room button to turn dimmer on to locally set slider level. Press "All On" to turn system lights on to full bright or "All Off" to turn lights off.

Central Antenna (1)

Plug into a standard wall outlet and place in a central location (can be under a couch). Central antenna ensures reliable radio frequency communication between all system devices.

JUNO TRAC 12[®] LOW VOLTAGE TRACK LIGHTING

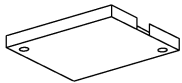

Miniature low voltage system that combines the 20-amp capacity with an extremely miniature engineered plastic profile. The system operates off of remotely located or in-line 12 or 24-volt transformers. A maximum of 240 watts (12 volts) or 480 watts (24 volts) can be placed per circuit or track. Key features include; 12 gauge solid copper conductors, thermoplastic ultra-miniature 3/8" H x 3/4" W profile, accepts all standard Trac 12 lampolders.

Sections include end-feed connector, dead end and mounting hardware. End-feed connector converts to straight connector when joining multiple track sections.

SYLVANIA METALARC SUPERSAVER ENERGY SAVING METAL HALIDE RETROFIT

Constructed with an enhanced arc tube for peak performance, Sylvania Metalarc and Metalarc Supersaver lamps are designed as energy saving replacement metal halide lamps. No ballast lamp is required.

150 Watt Supersaver

Saves 25 watts of power and \$25.00 of energy compared to a 175 watt metal halide lamp. Direct retro-fit for 175 watt metal halide lamps; operates on a standard 175 watt M57 CWA ballast.

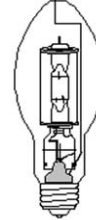

360 Watt Supersaver

Saves 40 watts of power and \$80.00 of energy compared to a 400 watt metal halide lamp. Direct retro-fit for 400 watt metal halide lamps; operates on a standard 400 watt M50 CWA ballast. Available in Metalarc Pro-Tech lamp design for use in open fixture applications.
